Upload your projects at GitHub

Basically, it is very easy and simple. Just follow the following video.
https://www.youtube.com/watch?v=J4rGAdlrMoc

Before you upload

- Prepare all your project file
- Create a GitHub repository as public
- Upload everything inside the repository
- Copy your repository link
  - Example:
    - https://github.com/rashidalasif/your-created-repository-name

Sample Project (Just for generating idea)

The following projects are just sample. You must create your own project.

- Python
  - https://github.com/ndleah/python-mini-project
- Data Science
  - https://www.geeksforgeeks.org/machine-learning-projects/
- Computer Networking
  - Campus network design and deployment (You can find in the shared drive)
